Atium SENSE. Food Systems data at scale

Connecting the world on sustainable food systems.

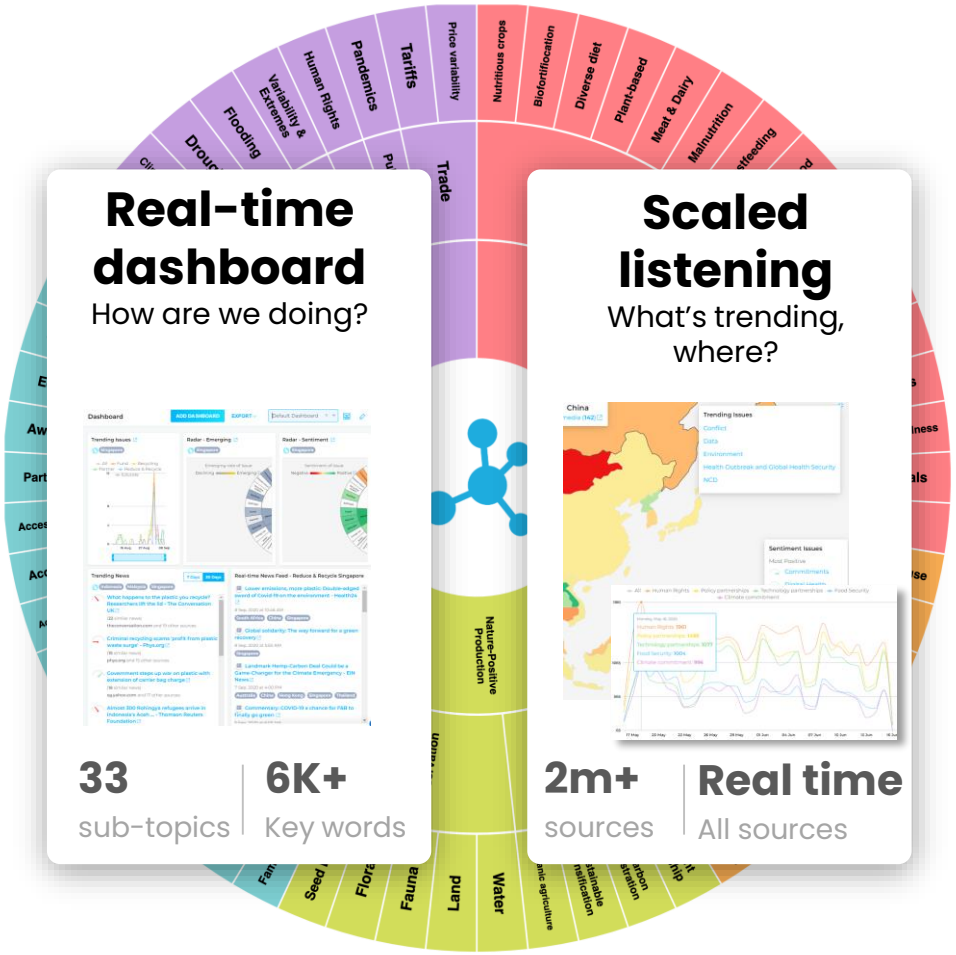
Atium SENSE is a **TSC Labs** AI/machine learning project designed to make sense of all food systems trends and the stakeholder ecosystems driving them in order to drive multi-stakeholder alignment and collaboration to achieve sustainable food systems. SENSE now tracks 100's of food initiatives, 1000's of influencers, 10 of 000's trends and sentiment across the globe in real time.

Real time listening

AI/ NLP machine learning

Mind + Machine curated

Archived data to 2008.



Real-time dashboard

How are we doing?

33 sub-topics | **6K+** Key words
